Mr. Paul Gavin, Executive Director
Gulf Regional Planning Commission
1635 Popp's Ferry Road, Suite G
Biloxi, Mississippi 39531

Dear Mr. Gavin:

In re: Mississippi Gulf Coast Apartment Market

In concurrence with our contract regarding the update of the Mississippi Gulf Coast Apartment Survey, we have conducted a detailed examination of the local multifamily rental housing market. This survey was conducted during July 2019 and included an analysis of existing apartment properties, a review of the multifamily rental housing projects under construction and an evaluation of overall market conditions. The research undertaken formed the basis for the collection and analysis of the statistical data contained in this report. The following paragraphs summarize our findings:

1. The 2019 apartment survey included both market-rent and assisted units in multifamily rental housing properties containing eight or more units located on the Mississippi Gulf Coast. The latest survey included 16,778 market-rent apartment units and 9,491 assisted rental units located in the three-coastal Counties. During recent years the rate of apartment construction has declined in the local housing market. In 2015 a total 388 new market-rent apartment units and no assisted units were placed on the market in the three-coastal Counties. Only sixteen new market-rate apartment units were completed between 2016 and 2018 on the Mississippi Gulf Coast. At the time of the 2019 survey, a total of thirty new market-rent apartment units were under construction.
2. During July 2019 the overall vacancy rate among market-rent apartments on the Mississippi Gulf Coast was 5.7 percent which is below the 6.3 percent rate in the 2018 survey, the 7.5 percent rate in the 2017 survey and the 8.9 percent vacancy rate in the survey conducted in 2016. The current vacancy rate is near the top of the four to six percent range considered "normal" in a housing market experiencing a "moderate" rate of growth.
3. The destruction caused by Hurricane Katrina, resulted in the demolition of a number of multifamily rental housing structures on the Mississippi Gulf Coast. All of the properties that were damaged but not destroyed have been renovated. In addition; a total of 3,096 new market-rent apartment units have been completed. These new or refurbished apartments have rental rates substantially higher than pre-Katrina rental rates. The removal of a large number of pre-Katrina constructed apartments and replacing them with pricier refurbished units or newly constructed properties altered the supply-price relationships in the local apartment market.
4. The July 2019 apartment survey indicated that the Biloxi area contains a total of 5,518 market-rent apartment units and the vacancy rate was 4.7 percent. The current vacancy rate is below the 7.0 percent vacancy rate in the 2018 survey. Segmenting the current vacancy rate in Biloxi by number

of bedrooms indicates a 2.5 percent vacancy rate among studio units; for one-bedroom units, 4.5 percent; among two-bedroom apartments, 5.0 percent and 3.9 percent among three-bedroom units. A total of forty studio apartments were surveyed in the Biloxi area and the average monthly rental rate was \$607.50. Among the 1,723 one-bedroom apartments surveyed in 2019, the average monthly rental rate was \$691.16 and has increased 5.2 percent above the average in the 2018 survey. A total of 3,117 two-bedroom apartment units was surveyed in the Biloxi area and the average rental rate was \$815.74 which is 3.5 percent higher than the average in the survey conducted thirteen months ago. A total of 638 three-bedroom apartment units was surveyed in the Biloxi area and the average monthly rental rate was \$1,000.99 which is 4.1 percent higher than the average rental rate in the apartment survey conducted in 2018. At present, thirty new market-rent apartments are under construction in the Biloxi area.

5. The 2019 apartment survey indicated that the Gulfport area contained a total of 4,550 market-rent apartment units and 4.0 percent were found vacant which is below the 5.3 percent vacancy rate in the 2018 survey and 7.0 percent in the 2017 survey. Segmenting the 2019 vacancy rate by number of bedrooms indicates a 3.8 percent vacancy rate among studio units; for one-bedroom units, a 3.6 percent vacancy rate; among two-bedroom units; 4.2 percent and 4.0 percent among three-bedroom apartment units. In the Gulfport area the average monthly rental rate for a one-bedroom apartment units was \$626.79 and has increased 2.1 percent above the average rental rate in the 2018 apartment survey. The average monthly rental rate among two-bedroom apartments in the Gulfport area is \$720.96 and has increased 5.4 percent above the average rental rate thirteen months ago. Among three-bedroom apartments the average monthly rental rate was \$893.45 and has increased 2.7 percent compared to the average three-bedroom monthly rental rate thirteen months ago. At the time of the 2019 survey no additional market-rent apartments were under construction in the Gulfport area.

6. The latest survey indicated a total of 3,075 market-rent apartment units existed in the Pascagoula area and the overall vacancy rate was 11.5 percent and above the 7.8 percent vacancy rate in 2018. The current vacancy rate is above the range considered “normal” in areas experiencing a “slow” or “moderate” rate of population growth. Segmenting the current vacancy rate by number of bedrooms indicates a 12.5 percent vacancy rate among studio units, 9.1 percent among one-bedroom units, 8.4 percent among two-bedroom units and 6.7 percent among three-bedroom units. The 2019 survey included twenty-four studio units in the Pascagoula area and the average rental rate was \$513.33. Among the 873 one-bedroom apartment units surveyed the average monthly rental rate was \$542.48 and increased 3.6 percent above the one-bedroom average monthly rental rate in the 2018 survey. A total of 1,872 two-bedroom apartments was surveyed in the Pascagoula area and 11.2 percent were vacant. The average rental rate among two-bedroom apartments in the Pascagoula area is \$617.36 and has increased 0.2 percent above the average monthly rental rate in the survey conducted thirteen months ago. A total of 306 three-bedroom apartment units was surveyed in the Pascagoula area and the average monthly rental rate was \$743.66 which represents a 1.7 percent decrease below the average in June 2018.

7. Harrison County is the largest of the three-coastal Counties and contains sixty-seven percent of the market-rent apartments on the Mississippi Gulf Coast. A total of 11,262 market-rent apartment units were surveyed in Harrison County and 4.2 percent were vacant. The July 2019 survey included a total of ninety-six studio apartments and the vacancy rate was 4.2 percent. The average rental rate among studio apartments in Harrison County was \$501.20. A total of 3,152 market-rent one-bedroom apartments were surveyed and the average rental rate was \$677.33 which is 5.7 per-cent higher than the average in the 2018 survey. A total of 6,644 two-bedroom apartments was surveyed and the

average rental rate was \$776.31 which represents a 5.5 percent increase above the average two-bedroom rental rate thirteen months ago. The latest survey included a total of 1,370 three-bedroom apartments in Harrison County and the average monthly rental rate was \$964.20 which represents a 6.0 percent increase over the average three-bedroom monthly rental rate in the 2018 survey. At present thirty additional market-rent apartment units are under construction in Harrison County.

8. The first apartment survey after Hurricane Katrina was in March 2007 and indicated that a total of 12,684 market-rent apartment units were occupied on the Mississippi Gulf Coast. The 2019 survey indicates that 15,830 market-rent apartment units were occupied or an increase of 3,146 occupied market-rent apartment units since Katrina. The absorption of market-rent apartments has slowed in the three-coastal Counties during recent years. This slowing trend is mainly related to the low level of multifamily rental housing construction starts and the “small-scale” conversion of existing multifamily rental housing units to owner-occupancy.

9. A large number of rental housing units have been developed on the Mississippi Gulf Coast under the Low Income Housing Tax Credit or Tax Exempt Bond programs since Hurricane Katrina. The first apartment survey after Katrina indicated that 1,363 occupied rental housing units were covered under the “tax-credit” or “tax-exempt” programs in the three-coastal Counties. The number of occupied “tax-credit” or “tax-exempt” units increased to 4,429 apartment units in the 2019 survey. In addition, five large properties containing 750-units covered under the Long Term Work Force Housing program have been built or substantially renovated and 724-units were occupied at the time of the 2019 survey. Most new rental housing properties covered under the “tax-credit/tax-exempt” and the “work force housing” programs are very attractive, contain an extensive amenity package but have “affordable” rental rates that resemble the middle segment of the non-assisted market.

10. Assisted apartments differ from market-rent apartments in that they receive direct governmental assistance and eligibility for occupancy is based on established income limits. The July 2019 apartment survey indicated a total of 1,102 assisted apartment units exist in Hancock County and twenty-seven units or 2.5 percent were vacant. At the time of the latest survey, no additional assisted apartments were under construction in Hancock County. A total of 5,675 assisted apartment units existed in Harrison County at the time of the 2019 survey and 214 assisted apartment units or 3.8 percent were vacant. The vacancy rate in 2019 among assisted apartments in Harrison County is slightly higher than the 3.4 percent vacancy rate in the 2018 survey. The majority of the vacant assisted apartment units were concentrated among “tax-credit” apartment properties or rental housing covered under Section 515. The 2019 apartment survey indicated that Jackson County contains 2,714 assisted apartments and eighty-four assisted units were vacant or a vacancy rate of 3.1 percent. The vacancy rate in the latest survey is slightly above the 2.8 percent vacancy rate in the 2018 apartment survey. At present no additional assisted apartments are under construction in Jackson County.

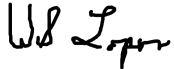

11. The 2019 apartment survey indicates a total of 9,491 assisted apartment units exist in the three-coastal Counties and the vacancy rate is 3.4 percent. The current vacancy rate is above the 3.2 percent rate in 2018 but below to the 4.0 percent vacancy rate in the 2017 survey, the 3.9 percent vacancy rate in the 2016 survey and the 3.8 percent vacancy rate in the 2015 survey and substantially below the 8.5 percent rate in the 2013 survey. A number of large “shallow” subsidy apartment complexes were built in response to the destruction caused by Hurricane Katrina. The high vacancy rate in 2013 was the result of those new constructed assisted rental properties passing through the “initial rent-

Mr. Gavin
Page IV
September 5, 2019

up” phase. These recently constructed assisted rental units have been absorbed by the Mississippi Gulf Coast housing market. It is our opinion, that a vacancy rate range of two to three percent in the assisted segment of the local apartment market has become the “normal” vacancy rate range. The current vacancy rate in the Mississippi Gulf Coast assisted apartment market falls within this range.

If you should have any question regarding the 2019 Mississippi Gulf Coast Apartment Survey, please call.

Sincerely,

MISSISSIPPI GULF COAST APARTMENT MARKET

INTRODUCTION

The Mississippi Gulf Coast Apartment Survey was updated during July 2019. Occupancy levels and rental rates in apartment markets are constantly changing. This survey reflects a “snap-shot” or overview during July 2019. The latest survey is a continuation of a series of reports on the Mississippi Gulf Coast Apartment market. The 2019 survey included 16,778 market-rent and 9,491 assisted apartment units in multifamily rental housing structures containing eight or more units located in Hancock, Harrison or Jackson Counties. Excluded from these surveys are renter-occupied single-family or duplex residential units, multifamily housing developments primarily offering “vacation” rentals, condo-hotels and condominium developments that are mainly owner-occupied but have rental units available. The purpose of this survey is to provide an indication of the current condition of the local apartment market. It is hoped that the availability of accurate data on the local apartment market will “encourage” the construction of new rental housing when desirable and “discourage” additional construction when not needed. Hopefully, this series of reports will contribute to balanced conditions in the rental segment of the local housing market. Therefore, furthering the continued healthy growth of the Mississippi Gulf Coast.

The data in this report is segmented by several variables such as number of bedrooms, location and market-rent or subsidized. Since the greatest differentiation among rental housing units is between “market-rent” apartments and those with “subsidized” rental rates; the governmental assisted rental properties were excluded from the majority of this report and given special treatment in the final section of this analysis.

MARKET-RENT APARTMENT MARKET

The major purpose of this report is to present an indication of the current condition of the market-rent segment of the local apartment market. An analysis of the supply-demand relationships in the local apartment market provides an overview of current conditions. A high degree of utilization of the supply would exist if a large proportion of the rental units in the local market were occupied. This situation would reflect “tight” market conditions and “soft” market conditions would exist if the supply of apartment units exceeded demand resulting in an excess of vacancies. A “balance” in the supply and demand of apartment units would indicate market equilibrium.

A logical starting point for analyzing the supply of apartment units is an examination of the development of the local apartment market. A total of 873 market-rent apartment units operational today; were built during or before 1969. The widespread destruction caused by Hurricane Camille in 1969 was followed by four years of a rapid rate of multifamily housing construction between 1971 and 1974. A sharp decline in rate of construction occurred in 1975 and remained at a relatively low level until 1981 when an additional 413 new apartment units were placed on the market. Between 1983 and 1987, the rate of apartment construction was relatively high. Many of the properties developed in the late eighties were characterized by an increase in the quality of construction, nine-foot ceilings, crown molding and extensive amenity features. The level of construction activity declined to a significantly lower level during the next seven years. The rate of multifamily rental housing construction intensified during the 1995-1996 period when a total of 1,347 new market-rental units were placed on the market. A downturn in construction activity followed before increasing again. After Hurricane Katrina there was a surge in multifamily housing construction and 2,452 new market-rent apartments were built between 2006 and 2009. The rate of construction declined between 2010 and 2014 and 240 market-rent apartments were completed. During 2015 a total 388-units were placed on the market. Only sixteen new market-rate apartments were placed on the market between 2016 and 2018. At the time of the 2019 survey thirty market-rent apartment units were under construction. Table 1 contains the number of market-rent apartments built by year in the three-coastal Counties.

The number of apartment units vacant and available “for rent” as a percent of all apartment units, is the effective vacancy rate and an indicator of market conditions. When viewing the market as a whole, tenant “turnover” results in “permanent” vacancies. The time period between “move-out” and “move-in” is an example of vacancies that will always exist in an apartment market and includes the preparation of vacant units for re-occupancy and the screening of new tenants. Also, vacancies resulting from the “initial rent-up” of new properties is a component

of “permanent” vacancies that will always exist. Population growth can be translated into an increase in the number of households. In order to satisfy long-term rental housing demand, construction starts should be at levels sufficient to satisfy net household formation, population in-migration and replacement requirements. The rate of growth is related to the justification of additional apartment construction, which results in an increased level of vacancies due to “initial rent-up” phase. Therefore, the “normal” vacancy rate is expressed on a sliding scale based on the rate of growth. A housing market with limited in-migration and “slow” population growth requires a smaller number of vacant rental units and less housing construction than a market experiencing “rapid” growth. In rental housing markets experiencing slow growth, a vacancy rate less than four percent is “normal” and reflects balanced conditions. In housing markets experiencing a “moderate” rate of growth, a vacancy rate between four and six percent is considered “normal” and would provide sufficient rental housing to accommodate “moderate” growth. In housing market experiencing a “rapid” rate of growth, a vacancy rate between seven and eight percent could accommodate these new households and would be considered “normal” or desirable. An annual growth rate of less than one percent would be considered a “slow” rate of growth, between one and five percent would be a “moderate” rate and annual increases of more than five percent is considered a “rapid” rate of growth.

Based on Census data; the annual average growth rate between 1990 and 2000 in Hancock County was 3.4 percent, in Harrison County the rate was 1.4 percent and 1.3 percent in Jackson County. Between 2000 and 2010 the rate of growth rate in the three-coastal Counties declined to 0.2 percent due to the impact of Hurricane Katrina. The Census Bureau estimates the July 2018 population of Hancock County to be 47,334; Harrison County to be 206,650 and Jackson County to be 143,277. The annual average rate of growth between the 2010 Census and the 2018 Census Bureau’s Population Estimate in Hancock County is 0.9 percent, in Harrison County it is 1.3 percent and in Jackson County the rate is 0.3 percent. It is concluded that during the decade before Hurricane Katrina, the Mississippi Gulf Coast experienced a “moderate” rate of growth and a “normal” vacancy rate would be in the four to six percent range. Since the 2010 Census, Hancock and Harrison County have experienced a moderate rate of growth and four to six percent is considered the “normal” vacancy rate. Since 2010 Jackson County has grown at a “slow” rate and a vacancy rate of four percent or less would be “normal” for the local rental market.

Table 2 presents an overview of the supply-demand relationships in the local apartment market and contains the number of apartment units and the number of vacant units that are available “for rent” in the 2019 survey. The overall vacancy rate is 5.7 percent which is below the rate in the last several surveys. The vacancy rate in Harrison County is within the range considered “normal” in areas experiencing a “moderate” rate of growth. Hancock and Jackson Counties are above the “normal” rate.

SOURCE: W. S. Loper & Associates.

The apartment supply and vacancy data presented in the previous tabulation can be segmented by city. By segmenting the data, a more detailed statistical analysis of the entire market and each city is offered. The local multifamily rental housing stock is not a homogeneous market and conditions vary between submarkets. The cities of Biloxi, Gulfport and Pascagoula contain the majority of the market-rent apartments units on the Mississippi Gulf Coast and account for sixty-eight percent of the total. The city of Biloxi contains 4,620 market-rent apartment units and has a vacancy rate of 5.1 percent, Gulfport contains 4,510 market-rent apartment units with a vacancy rate of 4.0 percent and Pascagoula contains 2,276 apartment units and has a vacancy rate of 11.7 percent. Contained in Table 3 is the market-rent apartment unit supply, the number vacant and the vacancy rate for each city or town on the Mississippi Gulf Coast based on the 2019 survey.

BAY SAINT LOUIS-WAVELAND AREA

The apartment market in Hancock County is relatively small and most of the market-rent and assisted apartment properties are located in the Bay St. Louis-Waveland area. The multifamily housing developments in Diamondhead are mainly owner-occupied or are part of the vacation/resort market and not included in this report. The July 2019 survey covered a total of 625 market-rent apartment units in the Bay St. Louis-Waveland area and the vacancy rate was 7.8 percent which is similar to the 7.5 percent in the 2018 survey. Segmenting the current vacancy rate by number of bedrooms indicates a 6.8 percent vacancy rate among one-bedroom units, 8.9 percent among two-bedroom apartments and 4.9 percent among three-bedroom units. The current vacancy rate among market-rent apartments is above the range considered “normal” for areas experiencing a “moderate” rate of growth.

Contained in Table 6 are selected characteristics of the market-rent apartment units located in the Bay St. Louis-Waveland area. The average rental rate among the seventy-four market-rent one-bedroom apartments surveyed was \$695.81 and is 4.4 percent above the average one-bedroom monthly rental rate in the 2018 survey. A total of 428 two-bedroom market-rent apartment units were surveyed in the Bay St. Louis-Waveland area and the average monthly rental rate was \$714.35 which is 0.3 percent above the average rental rate thirteen months ago. Among the 123 three-bedroom apartment units surveyed the average monthly rental rate was \$843.44 and has increased 3.2 percent above the average in the 2018 survey. There were no market-rent apartment units under construction in this submarket at the time of the 2019 survey.

Table 7 contains an outline of the non-assisted apartment rental rate structure in Hancock County. The distribution of rental rates presented in Table 7 is slightly distorted because of the limited number of one and three-bedroom apartments in this submarket and the narrow dispersion of rental rates.

BILOXI AREA

The 2019 apartment survey indicated that the Biloxi area contains a total of 5,518 market-rent apartment units and the vacancy rate was 4.7 percent. The current vacancy rate is slightly below the 7.0 percent vacancy rate in the 2018 survey. Segmenting the current vacancy rate in the Biloxi area by number of bedrooms indicates a 2.5 percent vacancy rate among studio units; for one-bedroom units, 4.5 percent; among two-bedroom apartments, 5.0 percent and 3.9 percent among three-bedroom units.

A total of forty studio apartments were surveyed in the Biloxi area and the average monthly rental rate was \$607.50. Among the 1,723 one-bedroom apartments surveyed in 2019 the average monthly rental rate was \$691.16 and has increased 5.2 percent above the average in the 2018 survey. A total of 3,117 two-bedroom apartment units was surveyed in the Biloxi area and the average rental rate was \$815.74 which is 3.5 percent higher than the average in the survey conducted thirteen months ago. A total of 638 three-bedroom apartment units was surveyed in the Biloxi area and the average monthly rental rate was \$1,000.99 which is 4.1 percent higher than the average rental rate in the apartment survey conducted thirteen months ago. At present, thirty new market-rent apartment units are under construction in the Biloxi area.

SOURCE: W. S. Loper and Associates.

Segmenting the current vacancy rate by number of bedrooms indicates a 3.8 percent vacancy rate among studio units; among one-bedroom units, a 3.6 percent vacancy rate; among two-bedroom units; 4.2 percent and 4.0 percent among three-bedroom apartment units.

In the Gulfport area the average monthly rental rate among one-bedroom apartments surveyed was \$626.79 and is 2.1 percent higher than the average rental rate in the 2018 apartment survey. The average rental rate among two-bedroom apartments in the Gulfport area is \$720.96 and is 5.4 percent higher than the average rental rate recorded a year earlier. Among three-bedroom apartments the average monthly rental rate was \$893.45 and has increased 2.7 percent over the average rental rate in the 2018 survey.

At present no additional market-rent apartments are under construction in the Gulfport area. However, a small apartment complex that was previously unavailable for occupancy is being renovated.

LONG BEACH-PASS CHRISTIAN AREA

The Long Beach-Pass Christian area contains 1,194 market-rent apartments and 3.6 percent were vacant at the time of the 2019 survey which is similar to 3.4 percent vacant in the 2018 survey. Segmenting the current vacancy rate by number of bedrooms indicates a 2.8 percent vacancy rate among one-bedroom units; 4.1 percent among two-bedrooms and 2.3 percent among three-bedroom apartment units. Among the 360 one-bedroom apartment units surveyed in the Long Beach-Pass Christian area, the average rental rate was \$762.21 and is 9.5 percent above the average monthly rental rate in the 2018 apartment survey. A total of 701 two-bedroom apartment units was surveyed in the Long Beach-Pass Christian area and the average monthly rental rate was \$820.23 which is a 6.0 percent increase over the average two-bedroom rental rate in the 2018 survey. A total of 129 market-rent three-bedroom apartments were surveyed in the Long Beach-Pass Christian area and the average monthly rental rate was \$1,114.13 which is 5.0 percent above the average market-rent three-bedroom monthly rental rate in the survey conducted thirteen months ago. At the time of the latest survey there were no market-rent apartment units under construction in this submarket. Table 10 contains selected characteristics of the market-rent apartments located in the Long Beach-Pass Christian area.

HARRISON COUNTY

Harrison County contains the largest number of market-rent apartments of the three-coastal Counties. A total of 11,262 market-rent apartment units were surveyed in Harrison County and 4.3 percent were vacant. The July 2019 survey included a total of ninety-six studio apartments and the vacancy rate was 4.2 percent. The average rental rate among studio apartments in Harrison County was \$501.20. A total of 3,152 market-rent one-bedroom apartments were surveyed and the average rental rate was \$677.33 which is 5.7 percent higher than the average in the 2018 survey. A total of 6,644 two-bedroom apartments was surveyed and the average rental rate was \$776.31 which represents a 5.5 percent increase above the average two-bedroom rental rate thirteen months ago. The latest

survey included a total of 1,370 three-bedroom apartments in Harrison County and the average rental rate was \$964.20 which represents a 6.0 percent increase over the average three-bedroom rental rate in the survey conducted thirteen months ago. At present thirty additional market-rent apartment units are under construction in Harrison County. Contained in Table 11 are selected characteristics of the market-rent apartments located in Harrison County.

Contained in Table 12 is an overview of the rental rate structure in Harrison County and the County's three sub-markets. Presented in Table 12 is the dispersion of monthly rental rates around the median. The median rental rate is the "mid-point" or value that divides the distribution of monthly rental rates into two equal parts; one-half of the monthly rental rates fall above the median rental rate and one-half below. The median is very descriptive because it reflects the "typical" monthly rental rate. For example, if the monthly rental rate of a two-bedroom apartment unit in the Biloxi area was \$800, it would be near the "middle" of the market because the median rental rate is \$799. If the same two-bedroom apartment unit rented for \$960, it would be near the "top" of the local market (eighth decile equals \$960) with eighty percent of the market-rent two-bedroom apartments in the Biloxi area renting for less.

OCEAN SPRINGS AREA

The 2019 apartment survey indicated that the Ocean Springs area contained a total of 1,816 market-rent apartment units and the vacancy rate was 3.2 percent. Segmenting the vacancy rate by number of bedrooms indicates a 2.9

percent vacancy rate among one-bedroom units, 3.7 percent among two-bedroom units and 2.0 percent vacancy rate among three-bedroom apartments. Among the 524 one-bedroom apartments in this submarket, the average rental rate was \$791.60 and has increased 9.3 percent over the average in the survey conducted thirteen months ago. A total of 1,090 two-bedroom apartments was surveyed and the average rental rate was \$885.25 which is 3.0 percent higher than average monthly rental rate for a two-bedroom apartment in the 2018 survey. Among the 202 three-bedroom apartments surveyed the average monthly rental rate was \$1,132.84 which represents a 9.7 percent increase over the average rental rate in the 2018 survey. At the time of the latest survey no market-rent apartment units were under construction in the Ocean Springs area. Contained in Table 13 are selected characteristics of market-rent apartments located in the Ocean Springs area.

PASCAGOULA AREA

The 2019 apartment survey indicates that the Pascagoula area contains a total of 3,075 market-rent apartment units. Before 1970 this apartment market was relatively small and only 225 market-rent apartment units exist today that were built before 1970 and only 178-units existed in the city of Pascagoula. During the seventies, a large number of apartment units were built in the Pascagoula area. The rapid increase in the number of market-rent apartments resulted in an increase in the supply that caused this market to remain “overbuilt” for a number of years. Since the mid-eighties, there has been very little market-rent apartment construction in the Pascagoula area and the only large market-rent apartment properties built were located in the Gautier area. At the time of this survey there were no new market-rent apartments under construction in the Pascagoula area.

The latest survey indicated an overall vacancy rate of 11.5 percent in the Pascagoula area which is considerably higher than the 7.8 percent vacancy rate in the 2018 survey but comparable to the 9.1 percent vacancy rate in the 2017 survey. The latest vacancy rate is above the range considered “normal” in areas experiencing a “slow” or a “moderate” rate of population growth. Segmenting the current vacancy rate by number of bedrooms indicates a 12.5 percent vacancy rate among studio units, 12.8 percent among one-bedroom units, 11.2 percent among two-bedroom units and 9.8 percent vacancy rate among three-bedroom units. The 2019 survey included twenty-four studio units in Pascagoula and the average rental rate was \$513.33. Among the 873 one-bedroom apartment units surveyed the average monthly rental rate was \$542.48 and increased 3.6 percent above the one-bedroom average rental rate in the 2018 survey. A total of 1,872 two-bedroom apartments was surveyed in the Pascagoula area and 11.2 percent were vacant. The average rental rate among two-bedroom apartments in the Pascagoula area is \$617.36 and has increased 0.2 percent above the average monthly rental rate in the survey conducted thirteen months ago. A total of 306 three-bedroom apartment units was surveyed in the Pascagoula area and the average monthly rental rate was \$743.66 which represents a 1.7 percent decrease over the average in the 2018 survey. At

the time of the latest survey there were no market-rent apartment units under construction in the Pascagoula area. Contained in Table 14 are selected characteristics of the market-rent apartments located in the Pascagoula area.

JACKSON COUNTY

A total of 4,891 market-rent apartment units were surveyed in Jackson County and the vacancy rate was 8.4 percent which is above the vacancy rate of 6.9 percent thirteen months ago and similar to the 8.5 percent vacancy rate in the 2017 survey. Contained in Table 15 are selected characteristics of the market-rent apartment units located in Jackson County.

SOURCE: W. S. Loper and Associates.					

Segmenting the current vacancy rate in Jackson County by number of bedrooms indicates a 12.5 percent vacancy rate among studio units, among one-bedroom rental units the vacancy rate was 9.1 percent, among two-bedroom units the vacancy rate was 8.4 percent and 6.7 percent among three-bedroom apartments. The average monthly rental rate was \$635.15 among the 1,397 one-bedroom apartments surveyed and has increased 5.7 percent since the 2018 survey. A total of 2,962 two-bedroom apartments was surveyed and the average rental rate was \$707.32 which is 0.2 percent higher than the average thirteen months ago. A total of 508 three-bedroom apartments was surveyed and the average monthly rental rate was \$898.41 which represents a 3.7 percent increase above the

average in the 2018 survey. At present no additional market-rent apartments are under construction in Jackson County.

Contained in Table 16 is a distribution of monthly rental rates of market-rent apartment units located in Jackson County and its two submarkets of the Ocean Springs area and the Pascagoula area. The median rental rate among one-bedroom apartments in the Ocean Springs area is \$784.29, among two-bedroom apartments the median is \$914.27 and \$1,072.32 among three-bedroom apartments. The median monthly rental rate in the Pascagoula area for a one-bedroom apartment is \$530.83, among two-bedroom units the median rental rate is \$592.81 and \$748.37 among three-bedroom apartments. The median rental rate in the Ocean Springs area is substantially higher than the median rental rate in the Pascagoula area. In our opinion, the higher median rental rate in the Ocean Springs area submarket is the result of several large market-rent apartment properties of recent construction located outside of the Ocean Springs corporate limits in the unincorporated area of Jackson County. Newer apartment properties typically support higher monthly rental rates relative to the entire market.

ASSISTED APARTMENT MARKET

Assisted apartments differ from market-rent apartments in that they receive direct or indirect governmental assistance and eligibility for occupancy is based on established income limits. An exception would be a minimum age requirement or physical disability qualification. In general, assisted apartment units have both rental rate and income level restrictions. The assisted apartment properties in the Mississippi Gulf Coast apartment market that provide a “shallow” form of rental assistance include the Low Income Housing Tax Credit (LIHTC) program, the Tax Exempt Bond program, the Long Term Work Force Housing (LTWFH) program and Section 515 without Rental Assistance (RA). The “deep-subsidy” programs include HUD’s Section 8, HUD’s Section 202/8, Rural Housing’s Section 515 with Rental Assistance (RA), Low Rent Public Housing (LRPH) and apartments originally developed under the Section 236 and Section 221d3 but now provide rental assistance under the Section 8 program.

In general, the “normal” vacancy rate among assisted apartment units is significantly below the “normal” vacancy rate among market-rent apartments. Contained in Table 17 is an overview of the supply and number of vacant assisted apartment units located in Hancock County. The July 2019 apartment survey indicated a total of 1,102 assisted apartment units presently exist in Hancock County and twenty-seven units or 2.5 percent were vacant. No additional assisted apartment units were under construction in Hancock County at the time of the July 2019 survey.

SOURCE: W. S. Loper and Associates.

Contained in Table 18 is an overview of the assisted multifamily rental housing units in Harrison County. A total of 5,675 assisted apartment units existed in Harrison County at the time of the 2019 survey and a total of 214 assisted apartment units or 3.8 percent were vacant. The vacancy rate in 2019 among assisted apartments is slightly higher than the 3.4 percent vacancy rate in the 2018 survey. The majority of the vacant assisted apartment units were concentrated among apartment properties covered under Section 515 or the tax-credit program. Slightly

less than half of the assisted apartment properties in Harrison County are covered under the “tax-credit” or “tax-exempt bond” programs. At present no addition assisted apartment units are under construction in Harrison County.

The 2019 apartment survey indicated that Jackson County contains 2,714 assisted apartments and eighty-four assisted units were vacant or a vacancy rate of 3.1 percent. The vacancy rate in the latest survey is slightly above the 2.8 percent vacancy rate in the 2018 apartment survey. At present no addition assisted apartment units are under construction in Jackson County. Contained in Table 19 is an overview of the assisted multifamily rental housing units in Jackson County.

SOURCE: W. S. Loper and Associates.

The 2019 apartment survey indicates a total of 9,491 assisted apartment units exist in the three-coastal Counties and the vacancy rate is 3.4 percent. The current vacancy rate is slightly above the 3.2 percent vacancy rate in the

2018 survey. In general, vacancies among assisted apartment units are minimal and result from tenant turnover, the time-period required for the screening and selection of new qualified tenants and the preparation of vacant units for re-occupancy.

A considerable number of “shallow” subsidy apartment complexes were built in the three-coastal Counties in response to the destruction caused by Hurricane Katrina. The 8.5 percent vacancy rate in the 2013 survey reflected these new “tax-credit” properties in the “initial rent-up” phase. These recently constructed assisted apartment units have been absorbed by the local rental housing market. Several years after this surge in construction, the assisted apartment market returned to market-balance. It is our opinion, that the current vacancy rate range of two to three percent in the assisted segment of the local apartment market has become the “normal” vacancy rate.

CONCLUSION

The 2019 apartment survey of the Mississippi Gulf Coast included both market-rent and assisted units in multi-family rental housing properties containing eight or more living units located in the three-coastal Counties. The latest survey included a total of 16,778 market-rent apartment units and 9,491 assisted rental housing units. The current vacancy rate among market-rent apartments was 5.7 percent and among assisted multifamily rental housing units the vacancy rate was 3.4 percent. At the time of this report, thirty market-rent and no assisted apartment units were under construction in the three-coastal Counties.

The latest apartment survey indicates that overall market conditions in the three-coastal Counties reflect an equilibrium between supply and demand. However, market conditions remain “soft” in the Pascagoula area segment of the Mississippi Gulf Coast apartment market. The overall apartment vacancy rate in the latest survey of the Mississippi Gulf Coast apartment market was 5.7 percent which is a continuation of a falling vacancy rate for the last several years. The vacancy rate in June 2018 was 6.3 percent and below the June 2017 rate of 7.5 percent which is below the 8.9 percent rate in June of 2016 and below the 9.4 percent rate in the 2015 survey.

The current vacancy rate of 5.7 percent is within the four to six percent range considered “normal” for areas experiencing a “moderate” rate of population growth. In the several years before Hurricane Katrina, the Mississippi Gulf Coast experienced a “moderate” rate of population growth and a market-rent vacancy rate in the four to six percent range was considered the “normal” vacancy rate. In the years after Hurricane Katrina, the rate of population growth slowed and a vacancy rate of four percent or less among market-rent apartments was considered the “normal” rate. Between the 2010 Census and the Census Bureau’s 2018 Population Estimate, the growth rate in Hancock County was 0.9 percent, in Harrison County it was 1.3 percent and in Jackson County the rate was 0.3 percent. It is concluded that overall the Mississippi Gulf Coast is now experiencing a “moderate” rate of growth and a “normal” vacancy rate would be in the four to six percent range. However, between 2010 and 2018 Jackson County has grown at a “slow” rate and a vacancy rate of four percent or less would be “normal” for the local rental housing market.

The apartment market in Hancock County is relatively small and most of the market-rent and assisted apartment properties are located in the Bay St. Louis-Waveland area. The 2019 survey covered a total of 625 market-rent apartment units in the Bay St. Louis-Waveland area and the vacancy rate was 7.8 percent which is similar to the 7.5 percent in the 2018 survey. Segmenting the current vacancy rate by number of bedrooms indicates a 6.8 percent vacancy rate among one-bedroom units, 8.9 percent among two-bedroom apartments and 4.9 percent among three-bedroom units. The current vacancy rate among market-rent apartments is above the range considered “normal” for areas experiencing a “moderate” rate of growth. There were no market-rent apartment units under construction in the Bay St. Louis-Waveland area at the time of the 2019 survey.

Harrison County contains the largest number of market-rent apartment units in the three-coastal Counties. A total of 11,262 market-rent apartment units were surveyed in Harrison County and 4.3 percent were vacant. The 2019 survey included a total of ninety-six studio apartments and the vacancy rate was 4.2 percent. The average rental rate among studio apartments in Harrison County was \$501.20. A total of 3,152 market-rent one-bedroom

apartments were surveyed and the average rental rate was \$677.33 which is 5.7 percent higher than the average in the 2018 survey. A total of 6,644 two-bedroom apartments was surveyed and the average rental rate was \$776.31 which represents a 5.5 percent increase above the average two-bedroom rental rate thirteen months ago. The latest survey included a total of 1,370 three-bedroom apartments in Harrison County and the average rental rate was \$964.20 which represents a 6.0 percent increase over the average three-bedroom rental rate in the survey conducted twelve months ago. At present thirty additional market-rent apartment units are under construction in Harrison County.

A total of 4,891 market-rent apartment units were surveyed in Jackson County and the vacancy rate was 8.4 percent which is above the vacancy rate of 6.9 percent thirteen months ago but similar to the 8.5 percent vacancy rate in the 2017 survey. Segmenting the current vacancy rate in Jackson County by number of bedrooms indicates a 12.5 percent vacancy rate among studio units, among one-bedroom rental units the vacancy rate was 9.1 percent, among two-bedroom units the vacancy rate was 8.4 percent and 6.7 percent among three-bedroom apartments. The average monthly rental rate was \$635.15 among the 1,397 one-bedroom apartments surveyed and has increased 5.7 percent since the 2018 survey. A total of 2,962 two-bedroom apartments was surveyed and the average rental rate was \$707.32 which is 0.2 percent higher than the average thirteen months ago. A total of 508 three-bedroom apartments was surveyed and the average monthly rental rate was \$898.41 which represents a 3.7 percent increase above the average in the 2018 survey. At present no additional market-rent apartments are under construction in Jackson County.

The destruction caused by Hurricane Katrina, resulted in the demolition of a number of apartment structures on the Mississippi Gulf Coast. Almost all of the properties that were damaged but not destroyed have been renovated. In general, these refurbished apartments were placed back on the market with rental rates substantially higher than their pre-Katrina rents. In addition to the renovated properties, a number of new market-rent apartments have been placed on the market and has added to the existing supply of apartments priced near the “top” of the local apartment market. The removal of a large number of pre-Katrina constructed apartments and replacing them with pricier refurbished units combined with the newly constructed properties has significantly altered the supply-price relationships in the local apartment market.

The first apartment survey after Hurricane Katrina was in March 2007 and indicated that a total of 12,684 market-rent apartment units were occupied on the Mississippi Gulf Coast. The 2019 survey indicates that 15,830 market-rent apartment units were occupied or an increase of 3,146 occupied market-rent apartment units since Katrina. Also, a large number of rental housing units have been developed on the Mississippi Gulf Coast under the Low Income Housing Tax Credit or Tax Exempt Bond programs since Katrina. The first apartment survey after Hurricane Katrina indicated that 1,363 occupied rental units were covered under the “tax-credit” or “tax-exempt” programs. The number of occupied “tax-credit” or “tax-exempt” units increased to 4,429 apartments in the 2019 survey. In addition, five large properties containing 750-units covered under the Long Term Work Force Housing program have been built and 724-units were occupied in the 2019 survey. Newly constructed rental housing properties covered under the “tax-credit/tax-exempt” and the “work force housing” programs are very attractive, contain an extensive amenity package but have “affordable” rental rates that resemble the middle of the non-assisted market.

The current low volume of multifamily rental housing construction and continued apartment absorption has resulted in a return to market equilibrium in almost all segments of the local apartment market. If there are no multifamily housing construction “starts” during the next twelve months on the Mississippi Gulf Coast and the current rate of growth continues, very “tight” market conditions will likely appear.

APARTMENT SURVEY

Contained in the following pages is a listing of the apartment properties included in this survey. Among the assisted apartment properties, a subscript below the name and address indicates the program providing assistance. For example, LIHTC denotes Low Income Tax Credit, LTWFH is the State of Mississippi’s Long Term Work

Force Housing program, CDBG shows a Community Development Block Grant assisted in the construction of the development, Sec. 515 denotes USDA's Rural Development and RA illustrates the number of apartment units that provide "deep" Rental Assistance under Section 532 and LRPB signifies Low Rent Public Housing. Also, next to each property is a brief listing of its unit and site amenities. The following "legend" describes these amenities.
