

Mississippi Gulf Coast

LANE DEPARTURE ACCIDENTS OUTSIDE OF THE URBAN BOUNDARY (Non-Interstate 10 Locations)

August 2024

GULF REGIONAL PLANNING COMMISSION

PROJECT DESCRIPTION

The project area for this study is the *Mississippi Gulf Coast Area* which includes *Hancock, Harrison, and Jackson* counties. Lane departure accident data was reviewed for the road segments in these three coastal counties. All the locations reviewed were *outside of the urbanized areas*. The sites included in this report do not include locations on *Interstate 10*.

MapInfo Pro software was used to identify clusters of lane departure locations on roadways of the *Mississippi Gulf Coast*. Locations with clusters of 3 or more lane departures in proximity were identified and mapped.

The following types of accidents that are considered *lane departures* are listed as follows:

- Run Off Road-Right
- Run Off Road-Left
- Run Off Road-Straight
- Head On

Accident data files for the following years were used for this project:

- 2020
- 2021
- 2022
- 2023

A data point (*red circle*) was assigned to each lane departure cluster identified. The following data was assigned to each point:

- Site Identification number
- Road/intersection location name
- Number of lane departures at the location
- County
- Functional Classification
- Site Description

SUMMARY OF FINDINGS

Of the sites reviewed, approximately 227 *lane departure cluster* locations were identified in the *non-urbanized* areas of the three coastal counties. (*1-10 locations not included in this report*)

Site summaries of the top 35 locations with 5 or more lane departures per location are included in this report. Of these locations:

- 4 locations were in Harrison County
- 10 locations were in Hancock County
- 21 locations were in Jackson County

The table below lists these 35 locations:
